LMCC (LINE MAINTENANCE CONTROL CENTER) ENGINEER. TAGUIG, PHILIPPINES / HYBRID WORK

Avia Solutions Group (ASG) Global Services Philippines is looking for an **LMCC Engineer** to contribute to the operations of **FL Technics**.

About FL Technics

As a trusted provider of tailor-made MRO solutions, FL Technics serves commercial aviation customers worldwide. With an extensive network spanning Europe, Asia-Pacific, Africa, the Middle East, and Canada, FL Technics boasts the largest independent line maintenance station network globally. Recognized as a Top Employer of 2024 by the Top Employers Institute, FL Technics prioritizes creating a supportive and rewarding work environment for its growing team across the globe.

As part of **Avia Solutions Group**, the world's largest ACMI provider operating more than 200 passenger and cargo aircraft worldwide, FL Technics stands at the forefront of innovation and excellence in the aviation sector.

Role Overview:

The **LMCC Engineer** plays a vital role in ensuring the safe, reliable, and efficient operation of the aircraft fleet by providing real-time technical support to line maintenance operations. Acting as the primary point of contact for stations, maintenance providers, and aircraft operators, this role focuses on troubleshooting aircraft defects, coordinating recovery actions during Aircraft on Ground (AOG) situations, and supporting maintenance planning activities. The LMCC Engineer works closely with engineering, maintenance, and operations teams to ensure operational continuity while maintaining the highest standards of safety and compliance.

Key Responsibilities:

- Serve as the primary technical contact for stations, line maintenance providers, and aircraft operators.
- Support troubleshooting activities and guide defect resolution in collaboration with line maintenance engineers and technical teams.
- Manage Aircraft on Ground (AOG) situations and coordinate recovery plans to minimize operational disruptions.
- Monitor ongoing aircraft technical issues and ensure timely communication with relevant internal and external stakeholders.
- Align maintenance actions with operational requirements and fleet priorities.
- Support maintenance planning and execution during transit checks, layovers, and overnight maintenance inputs.
- Coordinate multiple technical events simultaneously while maintaining focus on safety, compliance, and operational efficiency.

- Utilize maintenance systems, technical documentation, and digital tools to support decision-making and issue resolution.

What We Are Looking For:

- Degree in Aeronautical Engineering, Aircraft Maintenance Engineering, Aviation Technology, or a related field.
- At least 3 years of experience in aircraft maintenance, with exposure to line maintenance or Maintenance Control Center (MCC) operations considered a strong advantage.
- Knowledge of commercial aircraft maintenance practices, aircraft systems, and troubleshooting methodologies.
- Experience supporting Airbus A320 Family aircraft is highly preferred.
- Strong analytical and problem-solving skills with the ability to make sound technical decisions under pressure.
- Excellent communication and stakeholder coordination skills in a fast-paced operational environment.
- Demonstrated ability to prioritize and manage multiple aircraft technical events simultaneously.
- High level of teamwork, operational awareness, and customer-focused mindset.
- Proficiency in maintenance information systems, technical manuals, and digital maintenance tools.

Benefits for being part of our team:

- Be part of a global aviation leader recognized for excellence and employee well-being.
- Work in a hybrid setup with a collaborative and forward-thinking team.
- Opportunity to grow in a challenging and fulfilling role within the aviation industry.
- Your contributions will be valued and rewarded, with competitive compensation and employee recognition programs.

A remote workforce service centre supporting Avia Solutions Group’s ACMI airlines and MROs worldwide.
