

TECHNICAL SERVICES ENGINEER. CAIRNS, AUSTRALIA

Who We Are

Skytrans Australia is an Australian airline providing regional Regular Public Transport (RPT), ACMI (Aircraft, Crew, Maintenance, and Insurance), and Charter services, connecting communities across the country. The airline operates a fleet of 11 aircraft, including Dash 8 turboprops and Airbus A319 jets. Skytrans Australia is part of Avia Solutions Group, the world's largest ACMI provider, operating 142 aircraft across 6 continents and delivering a wide range of aviation services, supported by over 11,000 professionals across more than 250 subsidiaries worldwide.

About The Role

Reporting to the Continuing Airworthiness Manager, the Technical Services Engineer is responsible for providing technical support to the Part 145 maintenance organisation, troubleshooting defects, and assessing technical data relating to all fleet defects across our Dash 8 and Airbus aircraft. The position also supports Maintenance Watch by providing technical guidance and recommending appropriate actions to ensure disrupted aircraft are safely returned to service with minimal operational impact. In addition, the Technical Services Engineer will provide coverage for the Airworthiness Engineer as required.

This is a full-time position with flexible working hours, based at our Head Office located at Cairns Airport. This additional resource has been established to support the current needs of the Engineering Department.

Key Responsibilities

- Ensure the continued airworthiness, compliance and reliability of the Skytrans fleet.
- Manage technical relationships with OEMs, maintenance providers and vendors.
- Assess and coordinate aircraft modifications, repairs, Airworthiness Directives and Service Bulletins.
- Provide technical engineering support across maintenance and operational departments.
- Monitor aircraft systems, engines and life-limited components to maintain fleet performance and regulatory compliance.
- Maintain accurate technical records, documentation and CAMO processes.
- Support airworthiness reviews, compliance activities and engineering projects.

Qualifications and experience

- Dash 8 and A320 type courses completed desirable
- Dash 8 B1 or B2 Aircraft Maintenance Engineer Licence desirable
- Aviation industry experience, ideally within a regional airline environment.
- Strong working knowledge of Airline Technical Programs (Aerotrac, CAMP, IAS), Microsoft Office and Adobe applications.
- Excellent attention to detail, organisational and time management skills, with the ability to consistently meet deadlines.

- Strong communication and interpersonal skills, with the ability to work effectively both independently and as part of a team.
- Flexible and adaptable, with the ability to manage competing priorities and perform under pressure in a dynamic operational environment.
- Willingness and ability to travel as required.
- Current Aviation Security Identification Card (ASIC), or the ability to obtain one.

How to apply

If you are looking to contribute to a growing aviation organisation and be part of a team that values safety, collaboration, and operational excellence, we would love to hear from you. Please submit your application outlining your experience and suitability for the role.

Please note: Due to the volume of applications, only shortlisted candidates will be contacted. Applicants must have the right to live and work in Australia and be able to successfully complete pre-employment and ongoing medical, drug and alcohol screening requirements. Skytrans Australia is an equal opportunity employer committed to inclusive and fair recruitment practices. We strive to provide a respectful and accessible recruitment process for all candidates. If you require any adjustments throughout the recruitment process, please let us know so we can support your application.

Queensland-based Australian airline, providing seasonal alternatives to Europe and empowering Avia Solutions Group's ACMI services in the Asia-Pacific.
