

## **CAMO ENGINEER (MPRG) - FOR POOLING. TAGUIG, PHILIPPINES (THE)**

**Avia Solutions Group (ASG) Global Services Philippines** is looking for a **CAMO Engineer (for pooling)** to contribute to the operations of **FL Technics**.

### **About FL Technics**

As a trusted provider of tailor-made MRO solutions, FL Technics serves commercial aviation customers worldwide. With an extensive network spanning Europe, Asia-Pacific, Africa, the Middle East, and Canada, FL Technics boasts the largest independent line maintenance station network globally. Recognized as a Top Employer of 2024 by the Top Employers Institute, FL Technics prioritizes creating a supportive and rewarding work environment for its growing team across the globe.

As part of **Avia Solutions Group**, the world's largest ACMI provider operating more than 200 passenger and cargo aircraft worldwide, FL Technics stands at the forefront of innovation and excellence in the aviation sector.

### **Role Overview:**

The CAMO Engineer (MPRG) plays a critical role in ensuring continued airworthiness through the development, evaluation, and optimization of maintenance programs and Minimum Equipment Lists (MELs). This role focuses on reliability analysis, regulatory compliance, and data-driven maintenance decision-making. Working closely with OEMs, authorities, and internal stakeholders, the CAMO Engineer contributes to maintaining safe, efficient, and compliant aircraft operations while supporting continuous improvement in maintenance strategies.

### **Key Responsibilities:**

- Develop, evaluate, and revise customer Minimum Equipment Lists (MELs) and Maintenance Programs.
- Assess and optimize Maintenance Program effectiveness using reliability data and analysis.
- Monitor reliability programs and prepare reports (monthly, quarterly, annual) for stakeholders.
- Facilitate and support Reliability Review Board meetings and follow-up actions.
- Liaise with OEMs, TC/STC holders, aviation authorities, and customers on airworthiness matters.
- Support AD evaluations, aircraft delivery/re-delivery projects, and act as deputy to the Senior Engineer when needed.

### **What We Are Looking For:**

- Degree in Aeronautical Engineering or a related field.
- 1-2 years of experience in civil aviation maintenance or continuing airworthiness management.
- Knowledge of aviation safety standards, regulatory compliance, and safe operating practices.
- Understanding of reliability programs, data analysis, and reporting.
- Aircraft type training (minimum CAT C or General Familiarization).

- Detail-oriented, proactive, and capable of maintaining accurate technical documentation.

**Benefits for being part of our team:**

- Be part of a global aviation leader recognized for excellence and employee well-being.
- Work in a hybrid setup with a collaborative and forward-thinking team.
- Opportunity to grow in a challenging and fulfilling role within the aviation industry.
- Your contributions will be valued and rewarded, with competitive compensation and employee recognition programs.
