

BOEING 737 AIRCRAFT MAINTENANCE ENGINEER B1 OR B2/A. BRATISLAVA, SLOVAKIA

We are looking for a skilled and motivated Aircraft Maintenance Engineer to join our team. This role is crucial in ensuring the airworthiness and safety of our fleet, with a focus on performing maintenance tasks, troubleshooting technical issues, and ensuring compliance with aviation regulations. As an integral part of our engineering department, you will work closely with other engineers, flight operations, and various departments to maintain high operational standards. This position is ideal for individuals passionate about aviation, problem-solving, and working in a dynamic, multicultural environment.

Job responsibilities and duties:

- Perform aircraft maintenance in accordance with approved programs, manufacturer maintenance manuals, and specified procedures using designated tools, equipment, and materials.
- Accurately document all maintenance activities and records.
- Analyze maintenance data to determine necessary corrective actions before subsequent flights, identifying which faults can be deferred.
- Participate in employer-organized training sessions to enhance technical expertise.
- Utilize available information technologies to stay updated on technological procedures, maintenance manuals, organizational procedures, and human factor considerations.
- Adhere to all internal instructions and procedures issued by the employer and Head of Engineers.

Employee perks, benefits

- Young and Dynamic Team: Join an energetic workplace with like-minded professionals.
- Multicultural Environment: Be part of a team representing over 20 nationalities.
- Exciting Aviation Industry: Work in an attractive and evolving aviation environment.
