

A320 LICENSED AIRCRAFT ENGINEER. BANGKOK, THAILAND

Welcome aboard!

About us:

BBN Airlines Thailand is a leading provider of ACMI (Aircraft, Crew, Maintenance, and Insurance) and charter aircraft services across Thailand, tailored to meet the operational needs of airlines, tour operators, and aviation stakeholders worldwide.

As a partner of **Avia Solutions Group** — the world's largest ACMI provider — we have access to a global network of over 250 aviation businesses and are backed by a team of 14,000+ aviation professionals. The group's comprehensive services include MRO (Maintenance, Repair, and Overhaul), pilot and crew training, ground handling, and a wide range of aviation support solutions.

Responsibilities:

- Ensure aircraft are maintained as per the requirements of approved documents and other regulatory requirements in the most efficient and economical manner.
- Ensure aircraft are dispatched in a timely manner and with the highest technical efficiency and safety standard.
- Manages, controls, and supervises maintenance activities and ensures adequate coverage and support in accordance with standard procedures with full compliance to relevant airworthiness requirement.
- Monitors and controls maintenance checks activities to ensure work input requirements, quality standards, completion time, cost constraints and service agreement items are fulfilled.
- Ensure all aircraft documents and reports are properly recorded, accurate and promptly submitted.
- Ensure defects are rectified accurately and work is carried out as per current Aircraft Maintenance Manuals.
- Ensure all spare parts taken from store are recorded and inspected for general condition before being brought out from the store premises.
- Collects and/or generates reports on MOR and circulates to all departments.
- Participates in the evaluation, inspection, and acceptance of new or leased aircraft and prepares for the return of leased aircraft expeditiously.
- Reviews and investigates recurring defects, the use of Minimum Equipment List (MEL), deferred defects, Notes to Crew (NTC) and crew complaints with an objective of reducing such occurrences.
- Liaises with Approved Maintenance Organization of Line Maintenance for issues related to technical.
- Manage communication center 24 hours for daily line maintenance operations.
- Coordinate with other departments for daily needs of maintenance operations and in emergencies like change of aircraft, delays, cancellation, AOG and etc.
- Assist in handling of repetitive defects and AOG situations by researching defect history, determining corrective actions and in any other manner necessary.
- Identify and monitor critical real time and repetitive aircraft defects.
