

IMPLEMENTATION MANAGER. VILNIUS, LITHUANIA

Alright, so the story goes like this - 6 years ago there was a small team, who wanted to change the how aviation software market is established. We started with different concepts, tried out those in real operations and now we know, that we created something big, beautiful, and really cool with the help of AI, VR and other R&D things. So now, we are going forward and devoting our efforts in Sensus Aero, that we and users believe in, and going into the whole world. You may ask - what we have created? Currently we have a large ERP system with mobile applications specifically designed for aviation, which significantly helps the users and the business to thrive. What are our plans? We want to go beyond and continue expanding our ERP until it covers every business unit, and we have one true "All-in-one "software".

Main functions and responsibilities:

- Develop and maintain detailed project plans, including schedules, resource allocation, and budgets.
- Coordinate project activities and ensure that all team members are aligned with project objectives.
- Identify and mitigate project risks and manage project dependencies and critical path.
- Collaborate with clients to understand their business requirements and processes.
- Tailor the ERP solution to meet clients' specific needs.
- Lead cross-functional teams, including product management, development, sales, and others.
- Ensure project milestones are met and deliverables are completed on time and within budget.
- Act as the primary point of contact for clients, addressing any issues or concerns throughout the implementation process.
- Serve as the main point of contact for stakeholders and communicate project status, risks, and issues effectively.
- Effectively communicate project progress, challenges, risks, and successes to stakeholders at various levels.
- Manage end-to-end implementation projects, from project planning, execution to post-implementation support.

Requirements for the position:

- Bachelor's degree in Business Administration, Information Technology, or related field.
- Proven experience managing ERP implementation projects, preferably within the aviation industry.
- Strong project management skills, with the ability to effectively plan, organize, and prioritize tasks.
- Excellent communication and interpersonal skills, with the ability to build strong relationships with clients and internal teams.
- Knowledge of ERP systems and implementation methodologies.
- Ability to adapt to changing priorities and thrive in a fast-paced environment.
- Experience in Agile methodologies.
- Knowledge of project management software tools such as Microsoft Project, JIRA, Confluence

What we give in advance:

- Opportunity to work with innovative IT solutions for the aviation market;
- International work environment;
- Additional health Insurance after a probation period;
- Learning and development opportunities to further improve your skills;
- Gym in the office;
- Employee events;
- Employees' referral bonus;
- Possibility to work remotely;
- Indoor dining room;
- Perks.It benefit;
- Child's room in an office;
- Partnership discount system for cooperating companies.

Salary: from 3500 € (brutto)

Sensus AERO is an IT company that creates smart tools for aviation business management. Sensus AERO products fall into two categories of ERP (enterprise resource planning) software for the management of MRO and Ground Handling/Airport business lines and operations.
