

QA AUTOMATION SPECIALIST. VILNIUS, LITHUANIA

ABOUT COMPANY:

FL Technics is a global provider of tailor-made services for aircraft maintenance, repair, and overhaul (MRO), delivering solutions to commercial aviation customers worldwide. FL Technics operates in a vast network of representative offices, hangars, and shop facilities, as well as the largest independent line maintenance stations network across Europe, Asia Pacific, Africa, the Middle East, and Canada.

Recognized as Top Employer of 2026, awarded by the Top Employers Institute, FL Technics demonstrates continuous effort and investments to create a great work environment and ensure the well-being of the ever-growing team in Lithuania and across the globe.

FL Technics is part of Avia Solutions Group, the world's largest ACMI provider, operating a fleet of 192 passenger and cargo aircraft worldwide.

YOUR TASKS:

- Design, plan, develop and execute software tests and test plans.
- Automation of manual software tests.
- Ensuring quality and test coverage.
- Collaborate closely with product managers, engineers, and other stakeholders to understand product and technical requirements, ensuring thorough test coverage.
- Contribute to the creation and maintenance of testing standards, procedures, and guidelines.
- Provide mentorship and support to team members in quality assurance practices and methodologies.
- **Tools you will use:** Playwright, Jira, Confluence, GitLab, Docker.

WHAT YOU SHOULD BRING:

- Minimum of 3 years of experience in automated software testing.
- Proficiency with Playwright or similar testing tools.
- Proven hands-on experience as a Quality Assurance Engineer or Tester.
- Strong understanding of QA methodologies and their practical application.
- Experience with object-oriented programming language.
- Excellent problem-solving skills and attention to detail.
- Willingness to learn and master new technologies and concepts.
- Basic experience with SQL.
- Strong communication skills and ability to collaborate effectively across teams.
- Experience in API testing and familiarity with tools such as Postman.

Bonus Points for:

- Experience building QA processes from scratch.
- Knowledge of industry-standard testing practices.
- ISTQB or similar certification (optional but highly desirable).
- Experience with virtualization and Docker.
- Familiarity with cybersecurity concepts.
- Proficiency in Linux-based operating systems.
- Exposure to unit testing.
