

CRS B1/B2. TANGERANG, INDONESIA

NOW HIRING

OVERVIEW

We are looking for a talented and motivated CRS B1&B2 to join our dynamic team at **FL Technics Indonesia.** In this role, you will work closely with to help us achieve **general business objectives or goals**. If you are passionate about **Field or Position**, have a knack for **specific skills or attributes**, and are looking to grow your career, we encourage you to apply.

JOB DESCRIPTION

- Aircraft Inspection: Conduct thorough aircraft inspections to identify and document defects, damages, and irregularities.
- Maintenance and Repairs: Perform maintenance, troubleshooting, and repairs on various aircraft systems and components, including engines, avionics, airframes, and landing gear.
- Documentation: Maintain meticulous records of all maintenance and repair activities, ensuring regulatory compliance.
- Compliance: Ensure all maintenance and repairs adhere to aviation regulations and manufacturer specifications.
- Testing: Conduct post-maintenance functional tests and performance checks on aircraft systems to confirm proper functioning.
- Certification: Issue airworthiness certificates and approve maintenance tasks once they meet safety standards.
- Safety: Prioritize safety in all maintenance and inspection activities, following stringent safety protocols.
- Troubleshooting: Diagnose and resolve technical issues, implementing effective solutions to ensure aircraft safety and performance.
- Quality Assurance: Participate in quality control and assurance programs to uphold the highest maintenance and safety standards.

JOB REQUIREMENTS

- Area of Education: Possess at least a Diploma in aviation or a related field or equivalent
- Experience: Min. of 5 years of experience as a CRS or Engineering Staff
- Language Proficiency: Indonesia and English

- Certification: Must hold a valid Aircraft Maintenance Engineer (AME) license for Boeing and Airbus aircraft and possess a Basic License Airframe and Powerplant (A&P) or Avuonic
- Skills: Proficient in using tools, equipment, and diagnostic instruments related to aircraft maintenance. Extensive knowledge of aircraft systems, avionics, and engines is essential
- In-depth knowledge of aviation regulations and safety standards, including familiarity with FAA regulations and government aviation rules
- Attention to Detail: Exceptional attention to detail is required to identify and rectify aircraft defects accurately

FL Technics Indonesia is a global provider of integrated aircraft maintenance, repair, and overhaul (MRO) services with 20 000 sq. m. of hangar and office space at Soekarno-Hatta International Airport in Jakarta, Indonesia, where it employs approximately 200 aviation experts. The company has FAA-145 certificate and can perform full C and D checks on Airbus and Boeing aircraft.
