

## **IT PROJECT MANAGER (AUTOMATION & SYSTEMS). VILNIUS, LITHUANIA**

### **ABOUT COMPANY:**

FL Technics is a global provider of tailor-made services for aircraft maintenance, repair, and overhaul (MRO), delivering solutions to commercial aviation customers worldwide. FL Technics operates in a vast network of representative offices, hangars, and shop facilities, as well as the largest independent line maintenance stations network across Europe, Asia Pacific, Africa, the Middle East, and Canada.

Recognized as Top Employer of 2025, awarded by the Top Employers Institute, FL Technics demonstrates continuous effort and investments to create a great work environment and ensure the well-being of the ever-growing team in Lithuania and across the globe.

FL Technics is part of Avia Solutions Group, the world's largest ACMI provider, operating a fleet of 192 passenger and cargo aircraft worldwide.

### **ABOUT THE TEAM**

We are a team of 12 people driving digital transformation initiatives for FL Technics' aviation parts trading activity. Our mission is to automate business processes, increase efficiency, and unlock new opportunities for the business.

We work with a mix of solutions — some are off-the-shelf systems that we integrate, while others are developing in-house by extending our ERP and building custom applications.

We are looking for an IT Project Manager (Automation & Systems) who will take ownership of executing selected initiatives across the organization.

### **YOUR TASKS:**

- Take ownership of **execution of selected initiatives** — from initial brief to working solution;
- Refine and structure requirements and translate them into actionable tasks for internal and external development teams;
- Work closely with business stakeholders to ensure solutions fit real operational needs;
- Collaborate with development teams and ensure timely, high-quality delivery;
- Take a **hands-on approach** — including analyzing processes, validating solutions, testing when needed, and resolving gaps in requirements or data;
- Help the internal development team work in an Agile way by structuring backlog, coordinating sprints, and keeping delivery on track;
- Support the Tech Lead in maintaining delivery structure and consistency.

### **WHAT YOU SHOULD BRING:**

- At least **3 years of experience** in project delivery, business analysis, product manager, or similar roles;

- Proven ability to **independently drive initiatives from unclear scope to implemented solution**;
- Strong understanding of software development processes and Agile principles;
- Experience working directly with business stakeholders and translating needs into development tasks;
- Hands-on approach, working with development teams and business users, ensuring solutions are delivered;
- Ability to manage multiple projects in parallel and ensure their successful delivery;
- Strong problem-solving skills and ability to operate in situations where not everything is defined upfront;
- Experience working with tools such as **JIRA or similar**;
- Excellent Lithuanian and English language skills.

#### **WORKING AT FL TECHNICS:**

- Exclusive experience to the aviation business industry;
- Flexible working hours to promote work-life balance;
- Work remotely for up to one month a year;
- Additional private health and accident insurance;
- Discount system with partnering companies;
- Access to internal training and courses;
- Complimentary in-house gym and other sports activities;
- Supporting and cheering for your success team;
- Competitive salary range, final offer will be proposed based on your experience and competencies.

Seize this opportunity to soar to new heights with FL Technics! Apply now and be part of a globally acclaimed team shaping the future of aviation.

Salary: from 3800 € to 4900 € (brutto)
